

Living Resources ▪ *Review and Reinforce*

Environmental Issues

Understanding Main Ideas

Answer the following questions on a separate sheet of paper.

1. How are renewable resources and nonrenewable resources different?
Give two examples of each.
2. How is human population growth related to environmental problems?
3. Suppose a town wants to buy a polluted marsh on an abandoned factory's land, clean up the marsh, and use the area as a nature center for the town. What are three costs and three benefits of the town's proposal?
List them in the table below.

Costs	Benefits

Building Vocabulary

Answer the following items on a separate sheet of paper.

4. Give four examples of natural resources.
5. Define *environmental science* in your own words.
